EXPERIENCE

Eighteen, Cape Town — Full-Stack Engineer

MONTH 2022 - PRESENT

Designed and developed production-grade full-stack applications using **Node.js, React, TypeScript, and PostgreSQL**.

Built and maintained RESTful APIs for data-driven products, optimizing backend performance and database queries.

Integrated third-party authentication and payment systems while ensuring scalability and security.

Deployed and managed applications using **Vercel, Supabase** and other modern tools in both staging and production environments.

Collaborated with design and product teams to deliver clean UI/UX with responsive front-end components and scalable architecture

EDUCATION

IU Applied Sciences, Berlin — Bsc Computer Science

MONTH 2022 - MONTH 2025

Professional Overview

I'm a full-stack software engineer with strong experience building scalable, high-performance web applications using modern technologies. I specialize in end-to-end development — from architecting RESTful APIs and database schemas to delivering clean, responsive front-end interfaces. I'm passionate about creating efficient, well-structured systems that balance performance, maintainability, and user experience.
